The exhibition «BrUral. The shell of freedom. Broken / Made "opened in Nizhny Tagil Museum of Fine Arts. This exhibition was shown to the public in the spring in New York, and now she got to our city.

Tagilchane will see the joint work of young American artists Tagil and thanks to the project «BrUral», which is being implemented for several years. To present it in Tagil museum curators arrived - American artist Irina Danilova and Vladimir Seleznev from Yekaterinburg.

Irina Danilova

Irina Danilova thought that combines the Nizhny Tagil and the New York borough of Brooklyn. Bridge between them has become a legend that the Statue of Liberty was made of metal Tagil.

- It was a joy to know that the Urals and American artists speak the same language, are working on the same level - says the artist Irina Danilova. - Surprise ideas tagilchan visual solutions. Their works have a special lyricism, maybe it is due to the history of the region, with the legends. Urban environment affects the vision of the artist, but it's important, you guys translate the problem into a positive feature.

The visitors have a lot to wonder. All the exhibits are very different from what many are accustomed to seeing in the Museum of Art. In a dark room you will see a glowing Statue of Liberty, Vladimir Seleznev, depicted in old issues of the newspaper "Tagil Worker". Photo projects tagilchanina Fedor Telkova and Manhattan resident Ron Baron. Interesting work Yu Qi, who videotaped the process of removing the hard drive from your old files. So the author wanted to show that the destruction of works of art may have appeal.

"Do not try to just be happy life." The Museum-Reserve opened an exhibition of the artist with cerebral palsy

- After the project I became a different look at the hometown - recognized Angelina Kotova. - I have always loved him very much, but now tenderly treat his various little corner. It is a city-museum - every rusty door, wall, window - a showpiece.

First viewers of the exhibition with pleasure considered the exhibits sought secret meanings and admired the ingenuity of Conceptual artists.

- Very interesting tricks and techniques. Wow, what a collaboration between creative people is possible today. We did not find contrasts, the work of our guys are not opposed to working Americans. Art - a language that is understood around the world - say the young artists, students of the Ural College of Applied Arts and Design Sergei Gibatdinov, Pelagia Generalova.

It would be better to work out in the articles of wit (very necessary, and it shows) and let people write comments, not journalists "vsehnovostey."

Gelman won barely kicked with his crafts from Perm, and those to the same - albeit at the apartments placed this stuff. Postmodernism - a killer sense.

Do not confuse the concept. At first, it may be wise to look into the history of art - and then judge what is art and what is not. This applies to all, and to the viewer as well. Of course, this is hardly an art as it is unclear. In general, it is interesting to give a second life to old already unnecessary things things. Someone said in the first comment "this is not art. This crafts." But if we look at the origin of the word "artist" - a "hand" (Hand). And the author has left this comment intuitively right, that the artist is the one who created with his own hands. Duck why not art? The main thing to understand if it is the "soul".
